Identity and Access Management Program Review

Identity and Access Management (IAM) is a top focus area for security program strategies. K logix's IAM Program Review service is tailored to customer-specific starting points and desired outcomes. The goal is to improve maturity from a programmatic viewpoint.

WHY IS THERE A FOCUS ON IAM?

- Investment in Digital Transformation
- Fast-paced Cloud Adoption
- Rising Complexity of Cyber Attacks

Benefits of K logix's IAM Advisory Service

Extensive review and analysis of your overall IDAM strategy including technology investments, processes, and roadmap

Establish strong alignment between IDAM projects and business goals to ensure security is proactively included in transformation discussions

Assess overall maturity to gain a clear picture of areas of weakness and strength to consistently reduce risk and improve maturity

Receive deliverables geared to an executive business audience to gain justification and buy-in across the organization
