

Pre and Post Audit Assistance

In today's complex world, proving your cyber security maturity often requires more than a self-attestation. You need to bring in auditors to validate controls, ensure proper documentation, and help foster trust among partners and customers that you meet specific cybersecurity requirements. Not every organization is ready for an audit, and even those who find the challenge of staying audit-ready to be beyond what they can handle on their own.

At K logix, our team of cyber security experts is unparalleled. With a wealth of experience from the Big 4 Auditing to the US Air Force, we are adept at guiding organizations in their approach to enterprise-wide security. We have developed a series of specific program offerings to help organizations wherever they are on their audit journey.

OUR PROVEN PROCESS HELPS ORGANIZATIONS WITH THE FOLLOWING:

Pre-Audit

Post-Audit

With our extensive experience and a deep understanding of best practices in areas such as SOC 2, ISO 27001, CIS, and more, we are always ready to assist organizations on their audit journey.
