

SCORPION LABS

K LOGIX'S OFFENSIVE SECURITY TEAM

Scorpion Labs offerings empower organizations to gain a clear understanding of posture to proactively reduce risk and improve their programs, services and products. Our outcomes focus on both tactical findings and strategic advancement opportunities.

Our team believes in meeting customers where they are with our flexible, white glove approach. We spend time understanding your organization's business direction and vision, your unique organizational structure, technologies and key information security risks to determine the appropriate testing for your needs.

Scorpion Labs Differentiators

- Deep expertise and threat modeling to craft test plans based on specific customer needs
- Partner with customers to provide long-term value with adaptive testing that better aligns with adversary techniques and tactics
- Go beyond a deliverable with actionable recommendations to improve the overall security strategy and guide tactical initiatives
- Coordinate responsible disclosure of vulnerabilities identified in third-party systems or software
- Provide continuous testing capabilities within software development teams to assist with "shift left" approach to identifying vulnerabilities earlier in the development process
- Perform deeper technical assessments and coverage through source code assisted penetration testing
